

DUFATANYE

MONITORING REPORT

DUFATANYE PROGRAMME

PROJECT REVIEW MEETINGS
MUSANZE AND RUBAVU
DISTRICTS, RWANDA

20 - 21 AUGUST 2025

Overview

Project Goal

Young women and girls take the lead in leading in preventing, resolving conflict and peacebuilding through sports.

The Dufatanye Project Review Meeting with stakeholders was conducted on 20 August 2025 in Rubavu District and 21 August 2025 in Musanze District to reaffirm the programmes' mission and ensure continued alignment and momentum among rightsholders and local leaders. The meetings also aimed to collect the feedback of local stakeholders on the programme, and collectively develop new ways local stakeholders can support the programme.

RESPONDENTS
AND
MONITORING PURPOSE

The survey was designed to measure any shifts in perceptions regarding women's leadership in peacebuilding. Additionally, the survey gathered qualitative feedback on programme effectiveness and suggestions for future improvement.

Key Considerations

The respondent pool consisted of a larger proportion of men (62.5%) compared to women (37.5%).

While the project focuses on women and girls, the inclusion of men reflects a deliberate effort to foster inclusive dialogue around peacebuilding and gender equity.

The presence of both genders allowed for diverse perspectives and promotes the idea that peacebuilding is a shared responsibility.

Age Range

The largest age group represented was 35–44 (40.63%), followed by participants aged 25–34 and 45–54 (both at 21.88%).

This distribution suggests that most respondents are in the mid-adult range, likely indicating active professionals or community members who are engaged or interested in peacebuilding work.

The relatively low representation of youth (3.13%) and the absence of elderly participants highlight a potential area for broader engagement in future initiatives.

Disability/Difficulty

Most participants (84.38%) reported no form of disability, while a small percentage (15.63%) indicated having difficulty seeing. No other forms of difficulty were reported.

These findings help assess the inclusivity and accessibility of the activities for persons with disabilities. While physical disability representation is limited, the data suggests a need to evaluate and potentially improve accessibility, especially for participants with visual impairments.

Location

61.3%

District

38.7%

19 from Rubavu

12 from Musanze

37.5%

Province

62.5%

12 from the Northern Province

20 from the Western Province

The majority of participants were from the Western Province (62.5%), particularly Rubavu District (61.29%).

The Northern Province contributed 37.5% of the respondents, mainly from Musanze District.

The geographical distribution indicates strong engagement in these two districts and could inform future outreach strategies.

Perception Shifts

**Level of agreement with the statement:
“Girls and Women can lead in
Peacebuilding”**

Perception Shifts

Level of agreement with the statement:
“Girls and Women can lead in Peacebuilding”

BEFORE

Response Option	Responses	Percentage
Strongly agree	12	37.50%
Agree	18	56.25%
Neither agree/disagree	0	0.00%
Disagree	2	6.25%
Strongly disagree	0	0.00%

AFTER

Response Option	Responses	Percentage
Strongly agree	12	37.50%
Agree	18	56.25%
Neither agree/disagree	0	0.00%
Disagree	2	6.25%
Strongly disagree	0	0.00%

There was a clear positive shift in attitudes after the activities. The number of participants who "strongly agreed" with the statement increased significantly from 37.5% to 62.5%. Notably, all negative responses disappeared after the session, indicating a powerful impact of the activity in changing perceptions around women's capability and role in peacebuilding.

Women's natural resilience, empathy, and emotional intelligence.

The equal intellectual capacity of women when given opportunities.

The transformative power of education in empowering women.

Their central role in families and communities, making them influential peace agents.

Cultural awareness and unique life experiences that enhance their leadership potential.

RESPONDENTS BELIEVE WOMEN CAN LEAD IN PEACEBUILDING.

PARTICIPANTS EXPRESSED CONFIDENCE IN WOMEN'S ABILITY TO LEAD IN PEACEBUILDING, CITING FIVE KEY THEMES.

These responses reflect a growing acknowledgment of women as essential contributors to conflict resolution, transformation and sustainable peace.

Programme Improvement

Respondents provided constructive feedback to enhance the impact and reach of the programme.

Geographical Expansion

Respondents expressed a strong desire for the programme to be extended to other provinces and districts.

Capacity Building

Calls for more workshops, mentorship opportunities, and skill development sessions.

Improvement in Communication

A need for better pre-session information, clearer communication channels, and timely invitations.

Inclusion of Diverse Groups

Encouragement to involve more community leaders, youth, and local organisations.

Financial and Logistical Support

Recommendations included increasing transport allowances and resources for participants.

Support to the Programme

Participants committed to tangible actions to continue supporting women's leadership by:

Coaching and mentoring women and girls in leadership roles.

Organising community mobilisation events on gender equality.

Engaging men and boys in the dialogue to ensure inclusive peacebuilding efforts.

Supporting the creation and sustainability of women-led cooperatives.

Boosting women's confidence and encouraging them to participate.

How Respondents Plan to Support Women's Leadership

Activity Satisfaction Rates

Overall satisfaction with both the content and delivery of the session was very high.

A majority of respondents were “very satisfied,” with no dissatisfaction reported.

These results reflect the relevance, quality, and effectiveness of the materials and facilitation methods used. However, consistent with earlier feedback, there is room to deepen the content and increase accessibility across more locations.

SATISFACTION WITH CONTENT

Rating	Response	Percentage
Very satisfied	24	75%
Satisfied	8	25%
Neutral/ Dissatisfied	0	0%

SATISFACTION WITH FACILITATION/DELIVERY

Rating	Response	Percentage
Very satisfied	23	72%
Satisfied	9	28%
Neutral/ Dissatisfied	0	0%

Feedback to Improve Future Sessions

Respondents suggested several ways to enhance future review meetings. This feedback provides valuable guidance for future planning and execution of similar initiatives.

Share Agenda

Send topics in advance to allow preparation.

Time Management

Allow more time for discussions and reflections.

Logistics

Improve transport facilitation and communication.

Wider Participation

Include more sectors, local leaders, and community voices.

Session Depth

Expand training duration and encourage deeper engagement.
